Backend: Java | Node.js | Express.js | Postman API Testing | Basic Authentication and JWT

Databases: SQL | MongoDB

Programming: C | Java | Python(Basics) | Embedded C

Tools & Platforms: Git | | Github | | VS Code | | Postman | | Cursor | | Lovable ai ↗

Cloud: AWS(Beginner)

Certifications

Responsive Web design

Certification in Responsive Web design course offered by Freecodecamp

Introduction to Front End Development

Certification in Introduction to Front End Development by Coursera

Web Design Training

Completed the Certification Training program on Web Designing by Besant Technologies

React JS Training

Completed the Certification Training program on React JS by Besant Technologies

SQL Training

Completed the Certification Training program on SQL by Besant Technologies

Projects

MERN Advanced Authentication System

Developed a secure authentication web application using MongoDB, Express.js, React.js, and Node.js. Implemented user signup, login, and JWT-based authentication with password encryption and protected routes for enhanced security.

E-Commerce Website

Developed a E-Commerce web application using React.js , Bootstrap and integrated external APIs for product data.Implemented features like product listing, search , add-to-cart , payment gateway and responsive UI for user experience.

Student Support Portal

Designed and developed a full-stack web application using React, Spring Boot to manage student and admin interactions. Implemented a unified login system with dynamic redirection, attendance tracking, assignment management, and real-time updates.

Training

Java Full Stack

07/2025 – 12/2025
